

CRYPTOMINING RESOURCES:

Here are some great links for websites and apps to help prevent, as well as dealing with cryptomining attacks. Please spend some time becoming familiar with them, and bookmarking them for future reference.

- <https://brave.com/>
 - The latest version of the privacy-focused Brave browser will block cryptomining scripts from running in your browser by default. And plus it just a great browser to use overall for security and privacy
- <https://www.mozilla.org/en-US/firefox/new/>
 - The latest versions of the Firefox browser do a great job of blocking cryptomining scripts from running in your browser
- <https://noscript.net/>
 - The free NoScript Firefox extension provides extra protection for Firefox, and other Mozilla-based browsers. It will allow **JavaScript, Java, Flash and other plugins** to be executed only by **trusted web sites of your choice** (e.g. your online bank). As such, it will block any cryptomining scripts if you accidentally visit a site that has them running, and have scripts blocked by default
